Program tidak lagi memanggil file gambar secara kaku. Kode ini menggabungkan teknik linear-gradient (sebagai filter kaca film) dan url() gambar pemandangan dalam satu baris kode CSS inline.

Saat pengguna mengubah tema ke Gelap, filter otomatis berubah menjadi gelap pekat (opacity 85 - 92). Saat berpindah ke Terang, filter berubah menjadi putih transparan lembut.

Kelas backdrop-blur-2xl memerintahkan browser untuk membiaskan atau memburamkan objek apa pun yang berada di belakang kotak form tersebut.

Ditambah dengan kombinasi warna latar belakang yang semi-transparan (bg-black/40 artinya hitam dengan transparansi 40%), efek ini berhasil meniru tekstur kaca buram yang mewah.
